

"What a treasure chest of information for researchers - War Wings is a true undiscovered gem. It is a one of a kind book that will someday be recognized as a monumental and historic achievement. It is hard to fathom all the long hours of work that went into getting the detailed data and information that is contained within these wonderful pages. As an author and documentary film maker myself, I could see this book being used as a tool for anyone putting together a TV show or movie about the air combat in WWI. This book has put together a user friendly guidebook to aviation documentary motion pictures from the first war that classifies what is in the US National Archives. This is not a small achievement! The book is really specialized by virtue of the information it presents and may not be of much interest to the average reader of war or aviation books; however, for those with a deeper need for finding actual film footage from that war, this is a must have book. There is something in the last part of the book that might interest most readers--a reprinted article by Brigadier General "Billy" Mitchell that is worth reading. I give this book FIVE STARS because of its great value for historic preservation- but this book will have a small readership interest due to its very nature. This is not a casual book to sit down and read at the beach or the airport-this is for real aviation buffs, historians, film makers and perhaps, some college libraries. I found it enjoyable."

W.H. McDonald Jr., The American Author Association, Military Writer's Society of America and documentary film maker
